Booz Allen Hamilton Launches Cyber4Sight™ Threat Intelligence Services

McLean, Virginia – Booz Allen Hamilton today launched Cyber4Sight™ Threat Intelligence Services, which uses multiple data sources to identify and monitor an organization's unique cyber security profile, determine its "attack surface," and deploy military grade predictive intelligence to anticipate, prioritize and mitigate cyber threats 24/7. This anticipatory service produces real-time, practical indications and warnings so that commercial organizations can take defensive actions against cyber attacks long before they occur.

Today's cyber threats are increasingly targeting corporations and governments to conduct industrial espionage, undermine business and financial operations and sabotage infrastructure. A perimeter defense alone is no longer sufficient protection – adversaries are too many, too fast and too sophisticated. Organizations need a new paradigm that combines real-time security resources with a rigorous method of mitigating cyber risks. Booz Allen has combined its deep functional cyber expertise from the intelligence community with its operational military experience to create Cyber4Sight.

"In today's world, too many organizations wait until a cyber attack occurs before reacting to it," said Booz Allen Vice Chairman Mike Mcconnell. "Cyber4Sight marks a shift from today's largely reactive security posture to a preemptive, predictive intelligence perspective that ensures an organization stays one step ahead of its attackers."

Booz Allen's Cyber4Sight provides clients – from banks to insurance companies to energy utilities – with anticipatory cyber threat intelligence that allows them to cultivate a proactive security posture, get ahead of an attack, asses risks and take appropriate actions to mitigate future attacks. Cyber4Sight combines the science of Big Data with the art of analysis and information gathering to give clients a holistic, forward-looking cyber security program. This service is the result of a significant multi-year investment Booz Allen has made to create an infrastructure that globally integrates data collection, aggregation and analysis and engages cyber analysts from a myriad of disciplines.

McConnell continued, "Cyber4Sight stands apart from current services on the market. Booz Allen's commitment to keeping cyber experts trained on the latest techniques, our all-source approach to adversary threat analysis and our use of in-depth linguistic and socio-cultural analysis make this product unique. Also, this new platform meets a critical 'must have' for all companies: it creates a more efficient bottom line by lowering operating costs and eliminates the need to create proprietary cyber security systems and hire and train cyber personnel each time the threat environment changes."

Cyber4Sight provides cyber threat situational awareness, and helps public and private sector clients avoid surprises by delivering probability-based anticipatory warnings that help them avoid the cost of post-event recovery and mitigation, as well as the theft, destruction and public release of critical data. Booz Allen's Cyber4Sight holistic scope of managed service centers on:

- All-Source Data: Booz Allen's data collection, aggregation and analysis platform filters millions of pieces of data from thousands of sources in real-time, resulting in highly tailored information that includes feedback to continuously improve processes.
- Intelligence Analysis: Organizations make deliberate choices to conduct business transactions over the Internet, creating a constantly changing "attack surface" that can be exploited by cyber threats in real-time. Booz Allen analysts provide 24/7/365 threat monitoring to produce actionable and predictive information.
- Managed Client Services: The suite of Cyber4Sight products includes: trip-wire reports, situation reports (SITREPs), spot reports (SPOTREP), daily summaries and requests for analysis and response.

About Booz Allen Hamilton
Booz Allen Hamilton is a leading provider of management and technology consulting services to the U.S. government in defense, intelligence, and civil markets, and to major corporations, institutions, and not-for-profit organizations. Booz Allen is headquartered in McLean, Virginia, employs approximately 25,000 people, and had revenue of $5.86 billion for the 12 months ended March 31, 2012.

Booz Allen Hamilton Forward Looking Statement
This press release contains, or may be deemed to contain, "forward-looking statements" (as defined in the U.S. Private Securities Litigation Reform Act of 1995). Examples of forward-looking statements include information concerning the

announcement of Cyber4Sight. These statements give Booz Allen Hamilton's current expectation of future events or its future performance and do not relate directly to historical or current events. A number of factors could cause Booz Allen Hamilton's future actions and related results to vary from any expectations or goals expressed in, or implied by, the forward-looking statements included in this press release, possibly to a material degree. Some of these factors include, but are not limited to, the risk factors set forth in Booz Allen Hamilton's Annual Report on Form 10-K, filed with the Securities and Exchange Commission on May 30, 2012. All forward-looking statements included in this press release speak only as of the date made, and, except as required by law, Booz Allen Hamilton undertakes no obligation to update or revise publicly any such forward-looking statements, whether as a result of new information, future events, or otherwise.
